PROFILE

Software Engineer at a Turin startup, building full-stack web platforms in production with React, Next.js, TypeScript and PostgreSQL — and, in my own time, React Native apps with on-device AI. I come from UI design, so I care about interfaces that are clear, accessible (WCAG) and pleasant to use. Computer Science student at the University of Turin.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Refine, Ant Design

Mobile: React Native, Expo, Kotlin (Wear OS, Bluetooth Low Energy)

Backend & data: REST APIs, GraphQL (Hasura), PostgreSQL, Supabase, Redis, Spring Boot

Tools & practices: Git/GitHub, E2E testing, Husky, Agile, Figma, Brevo, FFmpeg

EXPERIENCE

Pindar Digital Dynamics S.r.l. · Turin, hybrid

Software Engineer

Jul 2026 – present

- Built a company CRM with React, AdminJS and Refine: data models, dashboards and internal tools.
- Event-driven notification system: microservices that react to database events and send personalized emails through Brevo.
- Added Redis caching to cut the platform's response times.
- Built P2Cam Studio, an FFmpeg-based web video editor, and a music streaming platform (pre-launch) with Next.js, PostgreSQL (Neon) and the Spotify and YouTube APIs.

Software Engineer – Intern

Nov 2025 – Jun 2026

- Back-office in React 18 and strict TypeScript with Refine and Ant Design that replaced manual database work for non-technical admins (47+ PostgreSQL tables via Hasura GraphQL).
- Advanced tables with filters, sorting and bulk actions, real-time updates via GraphQL subscriptions, CSV/Excel/JSON export.
- E2E tests on critical user flows and pre-commit checks with Husky (lint, formatting, tests).

Application Designer (part-time) · Xphoto, Tehran, Iran

Feb 2019 – Nov 2021

- UI, icons and launch animations for the PhotoKit photo-editing app (Google Play), using Photoshop and After Effects.

PROJECTS

Voice – on-device speech-to-text · React Native, TypeScript, Whisper

[GitHub](#)

Voice-notes app that transcribes Italian, English and Persian entirely on the phone, with no server: a live transcript while recording and a final time-coded transcript.

CookWhat – AI recipe app · React Native, Supabase, Google Gemini

Suggests what to cook from what's in your fridge; 65 offline recipes, Cook Mode and meal planning. AI key and quota kept server-side (Edge Functions), migrated from Firebase to Supabase, 103 tests.

Real-time heart rate from a Galaxy Watch · Kotlin, Wear OS, BLE

Smartwatch app that sends the heart rate to the phone every second over Bluetooth Low Energy (GATT), with about 2 s of delay, even in the background.

MedCheck – healthcare booking (university project) · React, TypeScript, Spring Boot

[GitHub](#)

Mobile-first web app with a guided questionnaire, a doctor map with filters and a full booking flow, designed around HCI principles and WCAG.

EDUCATION

BSc in Computer Science · University of Turin

2023 – present

Algorithms and data structures, Databases, Software engineering (Agile, TDD), Web technologies.

Post-secondary technical diploma, Arts · Islamic Azad University, Tehran

2016 – 2019

CERTIFICATIONS & LANGUAGES

Certifications: Meta React Native | Meta JavaScript | Meta Version Control (Git) | Principles of UX/UI Design

Languages: Persian (native) | Italian (B2) | English (B1)

I authorize the processing of my personal data in accordance with Italian Legislative Decree 196/2003, as amended by Legislative Decree 101/2018, and Article 13 of Regulation (EU) 2016/679 (GDPR), for recruitment and selection purposes.
